

Part 5

Make E Strip Sets and Sew More Segments

Cutting -

Fabric 2

- (1) $5\frac{1}{2}$ " wide strip cut from selvage to selvage.
- (1) $5\frac{1}{2}$ " x 25" strip

Fabric 4

- (1) $5\frac{1}{2}$ " wide strip cut from selvage to selvage.
- (1) $5\frac{1}{2}$ " x 25" strip

Sewing -

1. Sew a long strip of Fabric 2 lengthwise to a Fabric 4 strip of the same size.
2. Press to set the seam and then press the seam allowance towards Fabric 4.
3. The strip set should be $10\frac{1}{2}$ " wide along its entire length; each half of the set should measure $5\frac{1}{4}$ " in width.
4. Make a second strip from the shorter lengths of Fabrics 2 and 4.
5. Square up one end of each strip set. Starting from the squared up ends, cut a total of (40) $1\frac{1}{2}$ " segments.

6. Align one E segment along the left side of the partial block. The Fabric 2 portion of the segment should be even with the top of the partial block as shown.
7. Place the second E segment along the right side of the block, but flip it around so that Fabric 2 is positioned along the block's bottom edge.
8. Sew each E segment to its side of the block and press seam allowances either direction. The partial block should measure $10\frac{1}{2}'' \times 12\frac{1}{2}''$.
9. Repeat to add all remaining E segments to the 20 quilt blocks.

E Strip Set
